DETAILED ACTION

This Office action is response to the applicant's application filed on 11/2/2001.

Applicant's preliminary amendment filed on 11/2/01 to cancel claims 1-7, however there are only 1-6 claims are originally filed.

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 1-6 been renumbered 7-12.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 7-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 7 recites the limitation " the strip of intumescent material, the item". There is insufficient antecedent basis for this limitation in the claim.

5. Regarding claim 11, the phrase "can be" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention.

See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. As best understood, claims 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kirk (US 5,654,063) in view of Applicant's Admission of prior art. Kirk teaches pressure sensitive cover for fire resistance comprising a layer of intumescent material 14 covering by an overlay 24 of a plastic or foil laminate serves as flexible container, a layer of pressure-sensitive adhesive 16, release sheet 17. The cover comprises a scrim 18 is preferably in the form of an open mesh lattice or screen netting of fiber glass elements, a base member 20 formed of paper, such Kraft paper, foils such as aluminum foils, plastic sheet material (cols. 2-8, figs. 1-2). Kirk does not teach specifically the flexible container comprises a fabric net reinforced aluminum foil with polyethylene heat seal layer, and adhesive attached with liner. The applicant's admission on page 3, lines 19-22, and 27-29 teaches suitable material for the flexible container comprises of fabric net reinforced aluminum foils with polyethylene heat seal layer is commercially available from Alpha Associates, Inc., of Woodbridge, New Jersey, USA particularly the foil available under the designation Alpha Style 4413-VLS, and the adhesive covered with a detachable liner.

At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine Kirk with the applicant's admission for the flexible container made of fabric net reinforced aluminum foil with polyethylene heat seal layer from Alpha Associates, Inc. And the adhesive covered with a detachable liner. The motivation for doing so would have been to provide better bonding and more accuracy positioning for the fire-stopping device.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cornwall (US 6,405,502), (US 6,470,635), Stahl (US 6,360,502), Cornwall (US 5,035,097) teach fire stop device.
